A	Notation	5

Chapter 1

Introduction

This chapter says what the thesis is for and how it is laid out.

1.1 The question

Every thesis answers one question. State it in a sentence, then say why the answer matters and to whom.

1.2 What follows

Chapter 2 collects what is already known and Chapter 3 sets out the method.

Chapter 2

Background

2.1 Earlier work

Summarise the work this thesis builds on, in the order a reader needs it.

2.2 What is missing

Name the gap. The method in Chapter 3 is built to close it.

Chapter 3

Method

3.1 Setting

Fix the notation of Appendix A and the assumptions used throughout.

3.2 The procedure

3.2.1 First step

Describe the first step, and the quantity it controls:

$$\|u - u_h\| \leq Ch^2. \tag{3.1}$$

3.2.2 Second step

The bound (3.1) carries over to the second step unchanged.

Appendix A

Notation

h	the mesh width
u_h	the discrete solution
C	a constant independent of h
